

Product #(s) -64304

# **Safety Data Sheet**

For Emergency Call: CHEM-TEL (800) 255-3924 24 Hour Assistance

# 1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

**Product Name**: PolyGuard House and Siding Wash

**CAS Number:** 68349-02-0 / 7732-18-5 **Recommended Uses**: House and Siding Wash

**Company Identification** 

Manufacturer's Name: ZECOL PRODUCTS COMPANY Address: 4635 Willow Drive, Medina, MN 55340 Telephone – General Information: (763) 478-3438

#### 2. HAZARDS IDENTIFICATION

Hazard Classes: Corrosive to Metals Category 1

Skin Corrosion/Irritation Category 1B Eye Damage/Irritation Category 1

Specific Target Organ Toxicity (Single Exposure) Category 3- if dried to a powder

Signal Word: Danger

# **Hazard Statements:**

H290 May be corrosive to metals.

H314 Causes severe skin burns and eye damage.

H335 May cause respiratory irritation if dried to a powder.

# **Precautionary Statements:**

P101 If medical advice is needed, have product container or label at hand.

P102 Keep out of reach of children,

P103 Read label before use. P210 Keep away from heat.

P260 Do not breathe dusts or mists. P264 Wash thoroughly after handling.

P271 Use only outdoors or in a well-ventilated area.

P280 Wear protective gloves/protective clothing/eye protection/face protection.

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.

P303 + P361 + P353 IFON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin

with water/shower.

P304 IF INHALED: Remove person to fresh air and keep comfortable for breathing. P305 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact

lenses, if present and easy to do. Continue rinsing.

P306 + P360 IF ON CLOTHING: Rinse immediately contaminated clothing and skin with

plenty of water before removing clothes.

P310 Immediately call a POISON CENTER/doctor.

Product #(s) -64304

P363 Wash contaminated clothing before reuse.

P371 + P380 + 375 In case of major fire and large quantities: Evacuate area. Fight fire remotely due

to the risk of explosion.

P370 + P378 In case of fire: Use dry chemical, CO<sub>2</sub>, Alcohol-type foam and water spray for

extinction.

P390 Absorb spillage to prevent material damage.

P391 Collect spillage.

P406 Store in corrosive resistant container with a resistant inner liner,
P501 Dispose of contents/container to a specialized waste disposal plant in

accordance with local/regional regulations.

# **Hazard Pictograms:**

# 3. COMPOSITION/INFORMATION ON INGREDIENTS

Components	Typical Weight Percentage	CAS Number
Sodium Metasilicate Pentahydrate	1 - 2%	68349-02-0
Water	98-99%	7732-18-5

# 4. FIRST AID

**Eyes:** Immediately move victim away from exposure and into fresh air. If irritation or redness develops, flush eyes with clean water and seek immediate medical attention. For direct contact, remove contact lenses if present and easy to do so. Immediately hold eyelids apart and flush the affects eye(s) with clean water for at least 30 minutes. Seek immediate medical attention.

**Skin**: Immediately flush affected area(s) with large amounts of water while removing contaminated shoes, clothing and constrictive jewelry. If skin surface is damaged, apply a clean dressing and seek immediate medical attention. If skin surface is not damaged, cleanse the affected area(s) thoroughly by washing with mild soap and water. If irritation or redness develops, seek immediate medical attention.

**Inhalation**: Immediately move victim away from source of exposure and into fresh air. If respiratory symptoms or other symptoms of exposure develop, seek immediate medical attention. If breathing difficulties develop, oxygen should be administered by qualified personnel. Seek immediate medical attention.

**Ingestion**: \*\*\*DO NOT induce vomiting. Corrosive Material. Alkaline burns.\*\*\* If victim has any breathing difficulties, call for emergency help immediately. If victim is conscious and alert, immediately rinse mouth with water and dilute the ingested material by giving one glass of milk or water to drink; ½ glass to children under 5. Never give anything by mouth to an unconscious person. Call a physician or POISON CENTER. If possible, do not leave victim unattended.

Product #(s) -64304

**Note to Physician:** This material is corrosive and may cause alkaline burns including gastroesophageal, gastric or pyloric structures and stenosis. Severe (3<sup>rd</sup> degree) alkaline burns to the esophagus have been associated with an increased risk of esophageal cancer.

**Medical Conditions:** Conditions which may be aggravated by exposure include skin and respiratory disorders.

#### 5. FIRE FIGHTING MEASURES

**Suitable Extinguishing Media**: Dry chemical, CO2, Alcohol-type foam or water spray. Water spray is recommended to cool or protect exposed materials or structures. Carbon dioxide can displace oxygen. Use caution when applying carbon dioxide in confined spaces.

**Specific Hazards:** Contact with common metals can generate hydrogen, which can form flammable mixtures with air. If container is not properly cooled, it can explode in the heat of a fire.

**Hazardous Combustion Products:** May decompose upon heating to produce corrosive and/or toxic fumes.

**Special Firefighting Procedures**: For fires beyond the initial stage, emergency responders in the immediate hazard area should wear bunker gear. When the potential chemical hazard is unknown, in enclosed or confined spaces, or when explicitly required by DOT, a self-contained breathing apparatus should be worn. In addition, wear other appropriate protective equipment as conditions warrant (see Section 8). Isolate immediate hazard area and keep unauthorized personnel out. Cool equipment exposed to fire with water, if it can be done with minimal risk. Clean-up under expert supervision is advised.

# 6. ACCIDENTAL RELEASE MEASURES

**Personal Precautions:** Isolate hazardous area and keep unauthorized personnel out. Clean-up under expert supervision is advised. Wear appropriate protective equipment including respiratory protection as conditions warrant (see Section 8). See Sections 2 and 7 for additional information on hazards and precautionary measures.

**Environmental Precautions:** Stop spill/release if it can be done with minimal risk. Prevent spilled material from entering sewers, storm drains, other unauthorized treatment drainage systems, and natural waterways.

**Methods for Containment and Clean-Up:** Notify relevant authorities in accordance with all applicable regulations. Immediate cleanup of any spill is recommended. Dike far ahead of spill for later recovery or disposal. Absorb spill with inert material such as sand, earth or other non-combustible material, and place in suitable container for disposal. In case of soil contamination, remove contaminated soil for remediation or disposal, in accordance with local regulations.

### 7. HANDLING AND STORAGE

**Precautions for Safe Handling**: Wear protective gloves/clothing and eye/face protection. Wash thoroughly after handling. Use good personal hygiene practices and wear appropriate personal protective equipment (see Section 8). Do not wear contaminated clothing or shoes.

**Conditions for Safe Storage:** Keep container(s) tightly closed. Store only in approved containers. Keep away from any incompatible materials (see Section 10).

Product #(s) -64304

### 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

# **Exposure Guidelines**

Component	ACGIH TLV	ACGIH CEIL	OSHA PEL	OSHA STEL
Sodium				
Metasilicate				
Pentahydrate				

**Engineering Controls**: If current ventilation practices are not adequate to minimize exposure, additional ventilation or exhaust systems may be required.

# **Specific Personal Protective Equipment**

**Eye/Face Protection**: Wear a face shield along with goggles when working with corrosive, highly irritating or toxic substances. The use of eye protection that meets or exceeds ANSI Z.87.1 is recommended to protect against potential eye contact, irritation or injury

**Skin**: The use of gloves impervious to the specific material handled is advised to prevent skin contact. Users should check with manufacturers to confirm the breakthrough performance of their products. Depending on exposure and use conditions, additional protection may be necessary to prevent skin contact including use of items such as chemical resistant boots, aprons, arm covers, hoods, coveralls or encapsulated suits.

**Respiratory Protection**: Wear a positive pressure air supplied respirator in situations where there may be potential for exceeding airborne exposure limits (see exposure guidelines). A respiratory protection program that meets OSHA's 29 CFR 1910.134 and ANSI Z88.2 requirements must be followed whenever workplace conditions warrant a respirator's use.

Use a positive pressure air supplied respirator if there is potential for uncontrolled release, exposure levels are unknown, or any other circumstances where air-purifying respirators may not provide adequate protection.

**Other Protective Equipment**: Eye wash and quick-drench shower facilities should be available in the work area. Thoroughly clean shoes and wash contaminated clothing before reuse. It is recommended that impervious clothing be worn when skin contact is possible.

Suggestions provided in this section for exposure control and specific types of protective equipment are based on readily available information. Users should consult with the specific manufacturer to confirm the performance of their protective equipment. Specific situations may require consultation with industrial hygiene, safety, or engineering professionals.

# 9. PHYSICAL AND CHEMICAL PROPERTIES (approximate values)

**Appearance**: Red liquid **Odor threshold**: No data **pH**: Not applicable

Melting/Freezing Point: 0°C / 32°F Boiling point (at 1 atm): 100°C / 212 °F

Flash Point: Non-flammable

Auto-Ignition Temperature: Non-flammable

Product #(s) -64304

Evaporation rate (butyl acetate = 1): No data Flammability (solid, gas): Not applicable

Explosive Limits: Non-flammable

Vapor Pressure: No data Vapor Density (air = 1):

**Specific gravity (H<sub>2</sub>0 = 1)**: 1 @ 20°C / 68 °F

Solubility in water: Soluble Partition Coefficient: No data

**Decomposition Temperature:** No data

Viscosity: No data

#### 10. STABILITY AND REACTIVITY

Stability (thermal, light, etc.): Stable under normal conditions of storage and handling.

Conditions to Avoid: Avoid highly oxidizing conditions

**Incompatibility (materials to avoid)**: Avoid contact with strong acids and bases and metals such as aluminum, tin, zinc and their alloys.

Hazardous Decomposition Products: Oxides of carbon and sulfur.

Hazardous Polymerization: Will not occur.

# 11. TOXICOLOGICAL INFORMATION

**Acute Toxicity:** Estimated to be of low toxicity. Material is primarily water and there is no data on the other component.

Product/Ingredient Name	Result	Species	Dose
Sodium metasilicate pentahydrate			

**Skin Corrosion/Irritation:** Corrosive. Contact may cause severe irritation, skin burns and permanent skin damage.

**Serious Eye Damage/Irritation:** Corrosive. Contact may cause severe irritation, eye burns and permanent eye damage

**Signs and Symptoms:** Can causes severe irritation of nose, throat and digestive tract, nausea, vomiting, abdominal pain and breathing difficulties.

Skin Sensitization: None reported

Respiratory Sensitization: No data found.

Germ Cell Mutagenicity: There is insufficient information available to conclude that this material

is mutagenic

Carcinogenicity: No data found. It is not listed by NTP, IARC or OSHA.

Reproductive Toxicity: No data found.

Product #(s) -64304

Specific Target Organ Toxicity (Single Exposure): May cause respiratory irritation.

Specific Target Organ Toxicity (Repeated Exposure): No data found.

# 12. ECOLOGICAL INFORMATION

**Toxicity:** Low degree of aquatic toxicity.

Ingredient Name	Result (estimated based on similar material)	Species	Exposure
Sodium Metasilicate Pentahydrate	LC50 = 210 mg/l Fresh Water	Fish	96 hr

Persistence and Degradability: No data found

Bioaccumulative Potential: No data found.

Mobility in Soil: No data found

Other Adverse Effects: None known

# 13. DISPOSAL CONSIDERATIONS

The generator of a waste is always responsible for making proper hazardous waste determinations and needs to consider state and local requirements in addition to federal regulations.

Recycle wherever possible. Large volumes may be suitable for re-distillation or, if contaminated, incinerated. Can be disposed of in a sewage treatment facility.

This material, if discarded as produced would meet the criteria of a characteristic hazardous waste as defined by 40CFR 261 and would have the characteristic of corrosivity (D002). Use which results in chemical or physical change of this material could subject it to additional regulation as a hazardous waste.

# 14. TRANSPORT INFORMATION

DOT/TDG Proper Shipping Name: Not regulated DOT/TDG Identification Number: Not regulated DOT Hazard Class: None / TDG Hazard Class: None

**DOT/TDG Packing Group:** Not regulated **ERG Guide Number:** Not regulated

Marine Pollutant: No

# 15. REGULATORY INFORMATION

**TSCA:** Components are listed on the TSCA inventory.

**DSL:** Components are listed on the DSL inventory.

Product #(s) -64304

**OSHA (Occupational Safety and Health Administration):** This material is considered to be hazardous as defined by the OSHA Hazard Communication Standard.

This material has not been identified as a carcinogen by NTP, IARC or OSHA

**CERCLA/SARA – Section 302 Extremely Hazardous Substances and TPQ (in pounds):** This material does NOT contain chemicals subject to the reporting requirements of SARA 302 and 40 CFR 355 Appendix A and B.

**EPA (CERCLA) Reportable Quantity (in pounds):** This material does NOT contain chemicals subject to the reporting requirements of 40 CFR 302.4.

# CERCLA/SARA - Sections 311/312 (Title III Hazard Categories):

Acute: Yes Chronic: No Fire: No Reactivity: No

**CERCLA/SARA – Section 313 and 40 CFR 372:** This material does NOT contain chemicals subject to the reporting requirements of SARA 313 and SARA Title III and 40 CFR:

California Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65): This material does NOT contain detectable chemicals known to the State of California to cause cancer and/or reproductive toxicity.

#### Canada:

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and the SDS contains all the information required by the Regulations.

WHMIS Hazard Class: E (corrosive)

### 16. OTHER INFORMATION
